

# Inteplast® Reversible Beaded PVC Planking

Provides beautiful, versatile coverage for ceilings and walls. Designed to add modern to rustic finishing touches and complementary character. Engineered to reduce the time and labor needed for installation and maintenance.

Unlike wood and wood-based options, Inteplast Planking resists moisture and insect damage making it ideal for exterior ceilings and walls and high-moisture indoor spaces. The advantage of high-performance PVC, and ready-to-install design gives contractors and homeowners less concerns.

While durability is a priority, design and aesthetics are just as important for enhancing appeal. Transform the flat features of a ceiling or wall by combining Inteplast Planking with additional profiles: Inteplast PVC Chair Rail and Inteplast PVC Base.

① Chair Rail ② Planking ③ Base

## Advantages

- Can be used in high-moisture areas
- Each kit consists of six 34" long pieces covering 10.1 square feet of space
- Planks feature a tongue & groove nail fin assembly
- Fits perfectly with 1390 Chair Rail and 1623 Base Mouldings for a complete finish look
- Made of 100% PVC
- Prefinished and ready to install
- Uniform white finish that doesn't require painting but can accept 100% acrylic latex paints

Moisture Resistant

Insect Resistant

Ultra-Low  
Maintenance
